English – German*)

DURATION

2-day symposium with
accompanying exhibition

LOCATION

Kongresshaus Baden-Baden
Augustaplatz 10,
76530 Baden-Baden, Germany

ABOUT THE CONGRESS

The 12th International Engine Congress on February 25 and 26, 2025 in Baden-Baden will once again be based on three thematic pillars and looks at car and commercial vehicle engines as well as sustainable fuels in the overall system. This creates a technical and thematic depth that clearly sets this congress apart from other events.

The congress is rounded off by our accompanying trade exhibition of interesting suppliers and service providers. This enables participants to see the latest innovations and developments in the industry live.

Become an exhibitor and present your products and services to our specialist audience!

OUR OFFER

- Top-class participants
- Exclusive networking opportunities on site
- Breaks in the exhibition area
- Diverse promotion of the event
- Evening event as an additional communication platform
- Attractive exhibitor packages
- Individual support before and during the event

REACHABLE TARGET GROUPS

This event is primarily aimed at engineers and technicians in the industry or persons involved in research and teaching who are engaged in the optimization of the traditional development areas of the combustion engine or the advancement of procedures and systems to produce conventional or renewable fuels and lubricants. The lectures will be equally attractive for chemists and biologists who work in this industry.

The focus will be on both diesel and spark-ignition engines (gasoline / gas) for passenger and commercial vehicles and off-highway applications.

Please select the desired stand space:

- 6 sqm booth area basic
- 8 sqm booth area basic
- 10 sqm booth area basic
- 12 sqm booth area basic

€ 3,650

on request

on request

on request
